XML Paper Specification (XPS) – This feature converts most of the design documents into the XPS format for printing on the Windows operating systems and Internet printing. History AutoCAD was originally developed at Dynamic Ideas, an early 3D design firm that was purchased by the Aecom group. The first AutoCAD design was a model of the IBM System/360. This is sometimes called "AutoCAD 1.0". The Autodesk family of CAD products includes AutoCAD LT, a low-cost desktop publishing alternative to AutoCAD, and AutoCAD Architectural Desktop, a commercial program developed by Autodesk that can produce the same drawings as AutoCAD. AutoCAD Architectural Desktop is aimed at architectural, engineering, construction, and facility design firms and is a comprehensive feature-rich set of tools for designing, analyzing and simulating large-scale building projects and facilities. AutoCAD Architectural Desktop was based on AutoCAD LT, which in turn was based on DXF. The latest versions of both, AutoCAD LT 2010 and AutoCAD Architectural Desktop 2011 (2011.1), were released on the 18th of August 2010, while 2011.2 was released on April 26, 2012. The next planned release of AutoCAD Architectural Desktop is scheduled for version 2013. AutoCAD 2012 includes improved import and export features, which can convert files from other CAD software packages such as Autodesk Revit, MicroStation, and many others. AutoCAD LT was in use at Microsoft as the main and last design program used in the Windows XP era. As the DOS version was discontinued, the version of AutoCAD that was on Windows 95 and 98 was renamed AutoCAD 2000. AutoCAD 2000 started as a standalone program with a version number of "0.70", while the DOS version was called AutoCAD 1999 and was still version 1.0. The software that was released at the time was AutoCAD for Windows. The DOS version was dropped when Microsoft started to produce Windows NT, which replaced Windows 95 and 98. AutoCAD 2005 was the first release to include Microsoft Vista support. It also

marked the introduction of the upgraded AutoCAD LT 2007. In 2010, Autodesk dropped AutoCAD NT as a brand and decided to focus exclusively on AutoCAD LT. In July 2017, Autodesk released AutoCAD 2.0 ca3bfb1094
