Kumar Sanu Bingo Karaoke Html - Play & download free kumar sanu mp3 songs here.1. Field of the Invention The present invention relates to a mobile communication apparatus, a location registration method, and a computer-readable recording medium recording a location registration program for providing information about a user's location. 2. Description of the Related Art Generally, a mobile communication apparatus such as a mobile phone or an automobile telephone is capable of indicating to a user the present location and the location where the user made a call. There are various methods for indicating a user's location to the user. For example, there are a method of displaying the locations registered by users within the current range on a map on a display, and a method of generating an alert indicating the present location. In the former method, the location of the user is described by the number of the user registered in the current range, but no identification information is given for the purpose of being able to specify the location that is being described, and therefore, there is a problem that the user cannot easily identify the current location. In the latter method, a position of an arbitrary location is indicated to the user, and therefore, the user can identify the current location by displaying the arbitrary location where the user made the call in the display. In the latter method, it is desirable that the user is notified of the present location and the location where the user made the call by receiving appropriate visual or audio information. To achieve this, a method of changing the current location displayed on the display and the audio information in accordance with the location of the user is suggested. For example, Japanese Unexamined Patent Application Publication No. 11-283052 discloses a method of indicating the current location and the location where the user made the call by displaying the latter on the map and reproducing a message in accordance with the location of the user. c6a93da74d
